

TECHNICAL DATA SHEET (TDS)

EB50 COLOR PASTE

1. PROPERTIES

EB50 is a solvent-based pigment paste which can be used with transparent or colored epoxy and polyester based adhesives (mastics) in liquid and gel forms. It can be used by itself or can be mixed with other colors to make new colors. You may mix multiple colors together to create the perfect color match glue for your stone application.

- Set of 10 Universal Color Kit
- Suitable for polyester and epoxy adhesives.
- Available as a 9 color kit (colors listed below)
- Indoor and Outdoor use
- Easy color matching (add no more than 5%).
- Perfect consistency to mix into the adhesive
- Easy to squeeze bottle
- Perfect drop nozzle.

2. APPLICATION AREAS

Gluing, filling or repairing natural stones including marble, granite and travertine.

3. INSTRUCTIONS FOR USE

1. Add EB50 (from %2-3) to main component to reach the desired hue.
2. Different colors can be used to achieve desired hue.
3. Mix well to make an uniform color.
4. Then mix the main component with hardener as described on its label.

4. TOOLS REQUIRED FOR APPLICATION

Spatula
